

The country is facing an unprecedented public health emergency with the COVID-19 pandemic affecting several parts of the nation. The state government has made exceptional efforts to combat the crisis along with the involvement of all concerned.

The outbreak is leading to a high number of infected individuals, our public health facilities will face tremendous load to take care of the large number of patients. This overwhelming burden may not be met by the available PHARMACISTS in the public health system. The state government is augmenting and expediting increase in healthcare services in every part of the state.

The Punjab State Pharmacy Council requests all the PHARMACISTS that they should come forward and participate in this fight against COVID-19 in this hour of need. We request all PHARMACISTS to become frontline warriors and to show the world they are doing this for the sake of humanity. We urge PHARMACISTS to come onboard and work at the hospitals by lending a helping hand in the COVID-19 wards and ICU'S.
